

NUMBER

the 13th, the Annenghoy forts, on opposite side of the Illogue entrance, lying together 210 guns, were similar-
sacked and taken, and, though some
cannon was offered, I am thankful to
without a casualty on our side.

I have to express my entire approval of the conduct of the officers and men engaged in the series of laborious operations. I have felt it my duty to undertake—
The Commodore, captains and commanders, have received the most prompt efficient assistance, and their example influenced the officers and men. I have only mentioned the officers who have distinguished themselves prominently into notice.

The health of the men is remarkably good, and the squadron continues in an excellent state for any further service.

received the most cordial support of British and foreign communities from confidence that future benefit must be result. Her Majesty's Consul has rendered most valuable assistance, particularly from his intimate acquaintance with Chinese language.

My thanks are especially due to Commodore Foote and Smith, commanding U. S. naval forces, for the good order and harmony they have so largely contributed to preserve during the present crisis.

I have endeavored, as briefly as its importance will permit, to lay before your lordships every particular connected with my proceedings. The original cause dispute, though comparatively trifling, arose from the injurious policy pursued by the Imperial High Commissioner, ascribed to grave an aspect as to threaten

Though I shall continue to take steps in
 conjunction with Her Majesty's plenipoten-
 tary, in the hope of being able to bring
 matters to a satisfactory termination, I
 will be most anxious to receive the instruc-
 tions of Her Majesty's government on this
 important question.

I enclose a copy of a notice I have
 issued to the British community, by
 Her Majesty's Consul. I have, &c.,
 M. SEYMOUR,
 Rear Admiral, Commander-in-Chief.
 FRASER OSBORNE, Esq., M. P.,
 Admiralty, London.

PROPOSED DISCOVERY OF THE TOW-
 ER OF BABEL.

Correspondence of the Boston Traveller.

For nearly two years since I informed the readers of all the grand and instructive discovery in Ancient Nineveh, made M. Place, the French consul in Mosul, following up the researches of Mr. Botta and Mr. Layard he brought to light moments of the long entombed city, which naturally amazed and delighted the world. A man of genius and enthusiasm, he is encouraged by his successes to extend his researches, which he now closes with an achievement, which, if his opinions will be verified, will add imperishable lustre to his name. The Tower of Babel was supposed to exist only as a Biblical source—a thing of memory and not of substance. And indeed, to many who contended it only in its audacity and folly, it seemed a myth or a fancy only of Oriental 'imaginativens' or superstition. Besides

the great plain of Samaria, and no
priests or ruins remained as a proof of its
visible reality.

How surprising then, its discovery, if
every it shall prove—that Titian's struc-
ture, whose base was laid in the earth yet
linked with the waters of the flood, and
whose summit was designed to pierce the
heavens. And why not discovered if
Jehovah has yielded up her secrets after a
long of many centuries. The tower, once
the glory of the Galilean's excellency, has
ruined her gates again, if not to her. Per-
haps, at times, the living gen-
eration of her race, and in her cylinder
offer her history to the world's in-
vestigation. What remained for discovery in
ruin and ruin of the old world, but
yet, that mighty tower, that was destined
to pierce the skies and defy a second
flood. It seems too much for belief, what

and Babylon are brought back to the
of the living by a sort of re-creation,
their monuments of art are travelling
on, transmutations to amuse and delight
[1].

And, there, if Providence to be traced
does not discover. They serve not only
poies but to instruct; they not only
feed the curiosity, but establish beyond
doubt and controversy the veracity and
ration of the sacred records. The
of pure christianity begins to bloom
the early seats of the human race;
meet that it should be met by the light
reminiscent antiquity.

The substance of the information which
must been calculated relating to the dis-
covery of the Tower of Babel, I will give
a few words, expecting soon to receive
the details, at the same time, remarking,

... village of Arbella, so famous in his-
tory for the decisive battle fought near it
between Arius and Alexander, is only a few
days' journey from Mossul, in which M.
... wearied with the monotonous won-
der of Ninveh, set off with his accus-
tomed

dicen. Examine the

NUMBER 3.

BT The London correspondent of the *New York Tribune*, in a recent letter, says: "Harriman is in London as the agent of Cordella Howard. This being the season of pantomimes, there is little chance of securing an engagement for her before she is said to be in low spirits and had better not appear." Even Tom Thibb, who is exhibiting his own account, suffers peculiarly from the English, who are a matter of little account to the American people, and what the Americans lack in an amusing "humbug," they surmise to be in a "little humbug." It

urday, in speaking of the latter says

Agent for the sale of the famous Marbleized Granite. The following which we take from the Toronto Times, will give the reader an idea of its quality:—

"During the past year a patent has been taken out in Canada for the manufacture of a 'new building material under the above cognomen.' The inventor is J. H. ROBERT, of the village of Hamilton County, in England; by name of

J. O. FRANK,
GEO. NEILSON,
JHOS LEWIS,
F. MCANNANY,
B. E. DAVIS.

Directors

ROBERT M. ROY, Secretary to "The Belleville Gas Company," speaks with authority and

has enabled for this ten years in the Province. Its constituent parts are lime, sand, and granulated marble mechanically combined, and used as a mechanical masser as to prevent an exterior surface, and an interior of stone or brick. Embodied scientific men who have examined the process pronounce the theory perfect, and it only requires to be carried out into practice to produce an astonishing result.

Hitherto marble has applied to building purposes has been considered an article of luxury, confined exclusively to the use of the wealthy and aristocratic; by this discovery it will become an article of common use, since we are assured by the fact that ballings of polished marble can be erected as cheaply as a like of brick at \$8 per M.

Like all other great inventions, the principle

of this discovery is exceedingly simple. A portion, as mentioned by means of its own admission, was used in the manufacture of Portland cement, and thoroughly manipulated with granulated marble, and the whole pressed together by strong mechanical power until the mass becomes as dense as marble in its original state. As marble in its primary state is pure carbonate of lime, and mortar acts as a cement, the lime, being furnished by the marble, is not liable to the same decomposition as in the case of the ordinary mortar. It is, therefore, a fact, well known to the scientific community, that the use of marble in the manufacture of Portland cement is a most judicious and economical one, and that the use of marble in the manufacture of Portland cement is a most judicious and economical one.

of lime. The grained marble became a solid block as soon as the carbonate acid gas driven off by the heat is reabsorbed from the atmosphere, and the hydrate of lime changed to a carbonate.

This block of marble can be broken into a thousand pieces, and restored to its original state without the admixture of any foreign substance whatever. The only agents employed

All persons indebted to the said Isaac P. Reers, or that have any of these effects, are notified to pay or deliver the same to him, or to C. Young, his official Assignee, nominated in that behalf, by the Judge acting in the matter of the said Edition.

Dated this 11th day of February, A. D. 1857.

362 W. SMART, J. C. N.

NOTICE

WHEREAS a petition of Maurice Coville of Belleville, in the County of Hastings, having been filed in the Involunt Court, for the appointment of a Receiver of the said Maurice Coville, to take possession of the said premises, and to protect from process having been given to the said Maurice Coville, under the provisions of an Act of Parliament of this Province, passed in the eight year of the Reign of Her Majesty Queen Victoria; entitled "An Act for the

the right to use his creation in thirty counties in Canada West, for an average price of £2000 each, and Patents have been secured in England, France and the United States."

LOST VOICE RESTORED!

Many persons who have lost their voices, and who are unable to perform their duties, or to support their families, have been cured by the use of Dr. Williams' Pink Pills for Pale People. The following is a true story of a man who has been cured of a severe case of laryngitis, and who is now able to perform his duties as a teacher in a public school.

Wm. H. Foster, - - - - - New Bedford, Aug. 10.

"I am a teacher in a public school, and have been for many years. I have been afflicted with a severe case of laryngitis, and have been unable to perform my duties for many months. I have tried many remedies, but have not been able to get any relief. I have been advised to use Dr. Williams' Pink Pills for Pale People, and I have been taking them for several months. I have now been able to perform my duties as a teacher, and I am very much improved. I am very much indebted to Dr. Williams for the cure of my laryngitis."

sons of Wild Cherry, take this opportunity of offering a word in its favor, which you are also at liberty to publish. A few months since my wife's lungs became so much affected by a sudden cold, that the lost her voice and suffered from a severe cough. Her situation seemed almost her friends much alarm. Her physician, Dr. J. H. Hale, strongly recommended by those who used it, I purchased a bottle of your agent

in this place." She took it according to directions, and it produced a wonderful effect. Before using one bottle, she had completely recovered her voice, her pains subsided, and her health was soon fully restored.

Yours truly,
(Signed) HENRY G. BRIDGEMAN.

Marbleized Granite,

-FOR-

BUILDING PURPOSES.

ON the 27th of March, 1853, Letters Patent, under the Great Seal of the Province, were issued to **M. H. HEADLEY, of Walpole, Haldimand County, C. W.** for a new and extraordinary invention, to which we wish to call your attention. By it, sand, lime and marble are mixed together in different chemical proportions, and pressed into blocks for building purposes in such a manner as to present an exterior of marble and an interior of granite. The advantages of this improvement consist in its beauty, cheap-

[illegible]

The chemical affinities by which these ingredients unite, are of the most simple & commonplace kind. Lime in its primitive state, is a stone. From it the carbon is driven off by artificial heat, until nothing but oxide remains. This, when mixed with moist silicious matter, slowly hardens by absorption of carbonic acid gas from the atmosphere, changing the oxide into a car-

[illegible]

LOCK.
45

Fourth.—Its quickness of construction. Messrs. M. & J. H. Buck & Co. Lebanon, New Hampshire.

just patented a press that makes blocks sufficiently large to be used next day, which can also be used of R. & S. S. Patterson, Bellefonte, extra moulds for different kiln blocks.

Fifth.—The cleanliness.—Buildings erected stone can be erected as brick, at \$3 per sq. ft.; and buildings of polished marble can be made of brick, at \$3 per sq. ft. The price is less than the facilities for making turning incense.

Sixth.—The temperature.—The blocks pressed hollow, so as to leave open or dead air space in the walls, thus peculiarly adapting the cold weather.

It also saves latting, and two-thirds of the plastering. Hence, the blocks ecologically in the winter, as Wagner & Winter, Certificates

THIS extraordinary pre-
paration has been for
many years the most ef-
fective and speedily re-
medial

To those suffering from obstinate and confirmed coughs, they give the most satisfactory and perfect relief, and the ability to take colds easily, and a troublesome cough suggests the all-potent experience, the Warfare produce the most marked and permanent relief from all coughs and other symptoms, and entirely remove that unbecomingly irritable and weakness of the Lungs, which give rise to the complaint. The medicine is perfectly harmless, and it is a great pleasure to be obtained in all agreeable forms and pleasant to the taste, so that any child will readily take them; and they are warranted to give relief in ten minutes after they are taken.

Price 25 cents per box. For sale by all Druggists.

ONCE COLORED ALWAYS COLORED.—A

negro woman was relating her experience

to a gapping congregation of colored

people, who were seated in the

heaven. One of the ladies of color asked

her:

"Oh, get up, you 'posse I go in do

kinds of my accident," the woman said.

This reminds me of an anecdote of a

colored man who was so convinced of the

lowliness of his position, and that labor

was his natural lot, that he was even in

doubt as to a future state, believing that

"dey'll make nigger work eben ef he go to

heaven."

A clergyman tried to argue him out of

his opinion by representing that this could

not be the case, inasmuch as there was abso-

lutely no work for him to do in heaven.

His answer was:

"Oh, you 'gway, Massa. I know better.

If deety do no work for called, I'llk up dar,

dey'll make some fur de, and if de's de

vulin' make to de, dey'll make 'em 'shab

dressed up den. You can't fool dis child, Massa."

The 23rd WEEK ON AUSTRALIAN RAILROADS.

—Within all the Australian Railways cars

are displayed little red flags which have

been adopted by the stock of the internal

lines of the directors of the roads. A notice

put up in the cars explains the use of

them, they are to be displayed by travelers

in the event of an accident, the train will stop

in consequence, and help will be rendered.

But the notice in question came to

give warning against the stock of the

railroads. Whichever it adds, displays

them unnecessarily, shall be punished ac-

cording to the prescription of the 23rd article

of the regulations.

What is the punishment? What are the

provisions of this article? The notice does

not say, and this question puzzled two

Englishmen, who were traveling in the

railroad, said one of them, "there is a

very simple way of finding out."

"What is that?"

"No sooner said than done. Our English-

man put out, and laughed as they did it.

The signal officer, who was in the train,

said, the people came running and anxiously

asked 'what accident has happened.' Oh,

nothing is the matter, said the Englishman,

we are not in the train, we are in the

railroad. In the first place, we are each of

us to pay ten dollars fine. 'Here it is,' said

the Englishman with the most perfect sto-

icism. 'Well, now get out of the car—'

'Now stay here till we have the pleasure

of meeting you, in the train, and then we

will see the face of the sheepish English-

man. This was the 23rd article. Courier

des Eclair.
